INDEX TO AUTHORS

A

ABRAMCZUK, JAN. See SAWICKI, ROWIŃSKI, and ABRAMCZUK, 227

AFFARA, N. See CONKIE, AFFARA, HARRISON, PAUL, and JONES, 414

—. See HARRISON, CONKIE, AFFARA, and PAUL, 402

ALBERTINI, DAVID F., and ANDERSON, EVERETT. The appearance and structure of intercellular connections during the ontogeny of the rabbit ovarian follicle with particular reference to gap junctions, 234

ALLEN, NINA STRÖMGREN. Endoplasmic filaments generate the motive force for rotational streaming in *Nitella*, 270

ALLEN, RICHARD D. Food vacuole membrane growth with microtubule-associated membrane transport in *Paramecium*, 904

AMSTERDAM, A., and JAMIESON, J. D. Studies on dispersed pancreatic exocrine cells. I. Dissociation technique and morphologic characteristics of separated cells, 1037

—, and —. II. Functional characteristics of separated cells, 1057

ANDERSON, EVERETT. See ALBERTINI AND ANDERSON, 234

ANTOINE, JEAN-CLAUDE, AVRAMEAS, STRATIS, GONATAS, NICHOLAS K., STIEBER, ANNA, and GONATAS, JACQUELINE O. Plasma membrane and internalized immunoglobulins of lymph node cells studied with conjugates of antibody or its Fab fragments with horseradish peroxidase, 12

ARAKI, SHIGEKO MATSUKAWA. See TAMAI, ARAKI, KATSUTA, and SATAKE, 749

ATWOOD, H. L., and POMERANZ, B. Crustacean motor neuron connections traced by backfilling for electron microscopy, 329

—. See JAHROMI and ATWOOD, 599

AUERSPERG, NELLY. See YIP and AUERSPERG, 109

AVRAMEAS, STRATIS. See ANTOINE, AVRAMEAS, GONATAS, STIEBER, and GONATAS, 12

B

BAGGIOLINI, MARCO. See BRETZ and BAGGIOLINI, 251

BANKER, G., CHURCHILL, L., and COTMAN, C. W. Proteins of the postsynaptic density, 456

—. See COTMAN, BANKER, CHURCHILL, and TAYLOR, 441

BARBER, ROBERT P. See WOOD, MCLAUGHLIN, and BARBER, 541

BARD, JONATHAN. See ELSDALE and BARD, 343

BAUM, JULES L. See PERLMAN, BAUM, and KAYE, 306

BAUMANN, KARL. See BODE, POCKRANDT-HEMSTEDT, BAUMANN, and KINNE, 998

BEAUFAY, HENRY. See TULKENS, BEAUFAY, and TROUET, 383

BECK, DAVID P., and LEVINE, R. P. Synthesis of chloroplast membrane polypeptides during synchronous growth of *Chlamydomonas reinhardtii*, 759

BIEDLER, JUNE L. See PETERSON, O'NEIL, and BIEDLER, 773

BILLINGS-GAGLIARDI, S. See PALAY, BILLINGS-GAGLIARDI, and CHAN-PALAY, 1074

BODE, FOLKERT, POCKRANDT-HEMSTEDT, HANNELORE, BAUMANN, KARL, and KINNE, ROLF. Analysis of the pinocytic process in rat kidney. I. Isolation of pinocytic vesicles from rat kidney cortex, 998

BOHAN, TIMOTHY P. See BOYNE, BOHAN, and WILLIAMS, 780

BONDAREFF, WILLIAM. See NAROTZKY and BONDAREFF, 64

BOYNE, ALAN F., BOHAN, TIMOTHY P., and WILLIAMS, TERENCE H. Effects of calcium-containing fixation solutions on cholinergic synaptic vesicles, 780

BOYNTON, JOHN E. See HARRIS, BOYNTON, and GILLHAM, 160

—. See WANG, WANG, BOYNTON, and GILLHAM, 806

BRADY, T. See CLUTTER, BRADY, WALBOT, and SUSSEX, 1037

BRANTON, DANIEL. See ELGSAETER and BRANTON, 1018

BRETZ, URSULA, and BAGGIOLINI, MARCO. Biochemical and morphological characterization of azurophil and specific granules of human neutrophilic polymorphonuclear leukocytes, 251

BUNGE, RICHARD P. See PFENNINGER and BUNGE, 180

C

CAULFIELD, JOHN P., and FARQUHAR, MARILYN G. The permeability of glomerular capillaries to graded dextrans. Identification of the basement membrane as the primary filtration barrier, 883

CHAN-PALAY, V. See PALAY, BILLINGS-GAGLIARDI, and CHAN-PALAY, 1074

CHERIAN, K. See MAGEE, GOFF, SCHOKNECHT, SMITH, and CHERIAN, 492

CHURCHILL, L. See BANKER, CHURCHILL, and COTMAN, 456

—. See COTMAN, BANKER, CHURCHILL, and TAYLOR, 441

CLUTTER, M., BRADY, T., WALBOT, V., and SUSSEX, I. Macromolecular synthesis during plant embryogeny. Cellular rates of RNA synthesis in diploid and polytene cells in bean embryos, 1097

COHN, ZANVIL A. See STEINMAN, SILVER, and COHN, 949
CONKIE, D., AFFARA, N., HARRISON, P. R., PAUL, J., and JONES, K. *In situ* localization of globin messenger RNA formation. II. After treatment of Friend virus-transformed mouse cells with dimethyl sulfoxide, 414
—. See HARRISON, CONKIE, AFFARA, and PAUL, 402
COSS, RONALD A. Mitosis in *Chlamydomonas reinhardtii*. Basal bodies and the mitotic apparatus, 325
—, and PICKETT-HEAPS, JEREMY D. The effects of isopropyl-*N*-phenyl carbamate on the green alga *Oedogonium cardiacum*. I. Cell division, 84
COTMAN, C. W., BANKER, G., CHURCHILL, L., and TAYLOR, D. Isolation of postsynaptic densities from rat brain, 441
—. See BANKER, CHURCHILL, and COTMAN, 456
CULP, LLOYD A. Substrate-attached glycoproteins mediating adhesion of normal and virus-transformed mouse fibroblasts, 71

D

DANIEL, JON C., KOSHER, ROBERT A., HAMOS, JAMES E., and LASH, JAMES W. Influence of external potassium on the synthesis and deposition of matrix components by chondrocytes in vitro, 843
DANIELS, MATHEW P., and HAMPRECHT, BERND. The ultrastructure of neuroblastoma glioma somatic cell hybrids. Expression of neuronal characteristics stimulated by dibutyryl adenosine 3′,5′ cyclic monophosphate, 691
DAVIS, WALTER L., GOODMAN, DAVID B. P., SCHUSTER, RICHARD J., RASMUSSEN, HOWARD, and MARTIN, JAMES H. Effects of cytochalasin B on the response of toad urinary bladder to vasopressin, 986
DODGE, J. D. See OAKLEY and DODGE, 322
DORWIN, JAN M. See LANKS, DORWIN, and PAPIRMEISTER, 824
DUBBS, DEL ROSE. See KIT, LEUNG, JORGENSEN, TRKULA, and DUBBS, 505
DUNHAM, PHILIP B., GOLDSTEIN, IRA M., and WEISSMANN, GERALD. Potassium and amino acid transport in human leukocytes exposed to phagocytic stimuli, 215

E

ELGSAETER, ARNLJOT, and BRANTON, DANIEL. Intramembrane particle aggregation in erythrocyte ghosts. I. The effects of protein remov..., 1018
ELLISMAN, MARK H. See RASH and ELLISMAN, 567
ELSDALE, TOM, and BARD, JONATHAN. Cellular interactions in morphogenesis of epithelial mesenchymal systems, 343
ENGEL, W. KING. See Letters to the Editor, 713

F

FAHIMI, H. DARIUSH. The effect of buffer storage on fine structure and catalase cytochemistry of peroxisomes, 675
FARQUHAR, MARILYN G. See CAULFIELD and FARQUHAR, 883
FAWCETT, DON W. See FRIEND and FAWCETT, 641
FRIEND, DANIEL S., and FAWCETT, DON W. Membrane differentiations in freeze-fractured mammalian sperm, 641
—, and RUDOLF, IRENE. Acrosomal disruption in sperm. Freeze-fracture of altered membranes, 466

G

GARBER, MELVIN P., and STEPONKUS, PETER L. Identification of chloroplast coupling factor by freeze-etching and negative-staining techniques, 24
GELBOIN, HARRY V. See WHITLOCK, MILLER, and GELBOIN, 136
GIBBONS, BARBARA H., and GIBBONS, I. R. Properties of flagellar "rigor waves" formed by abrupt removal of adenosine triphosphate from actively swimming sea urchin sperm, 970
GIBBONS, I. R. See GIBBONS and GIBBONS, 970
GILLHAM, NICHOLAS W. See HARRIS, BOYNTON, and GILLHAM, 160
—. See WANG, WANG, BOYNTON, and GILLHAM, 806
GLAUERT, AUDREY M. The high voltage electron microscope in biology, 717
GOFF, CHARLES W. See MAGEE, GOFF, SCHOKNECHT, SMITH, and CHERIAN, 492
GOLDSTEIN, IRA M. See DUNHAM, GOLDSTEIN, and WEISSMANN, 215
GONATAS, JACQUELINE O. See ANTOINE, AVRAMEAS, GONATAS, STIEBER, and GONATAS, 12
GONATAS, NICHOLAS K. See ANTOINE, AVRAMEAS, GONATAS, STIEBER, and GONATAS, 12
GOODMAN, DAVID B. P. See DAVIS, GOODMAN, SCHUSTER, RASMUSSEN, and MARTIN, 986
GRUSKY, GEORGE. See ZUCKER-FRANKLIN and GRUSKY, 855

H

HALL, MICHAEL O. See NIR and HALL, 587
HAMOS, JAMES E. See DANIEL, KOSHER, HAMOS, and LASH, 843
HAMPRECHT, BERND. See DANIELS and HAMPRECHT, 691
HARRIS, ELIZABETH H., BOYNTON, JOHN E., and GILLHAM, NICHOLAS W. Chloroplast ribosome biogenesis in *Chlamydomonas*. Selection and characterization of mutants blocked in ribosome formation, 160
HARRISON, P. R., CONKIE, D., AFFARA, N., and PAUL, J. *In situ* localization of globin messenger RNA formation. I. During mouse fetal liver development, 402
—. See CONKIE, AFFARA, HARRISON, PAUL, and JONES, 414
HIGASHINAKAGAWA, T. See MATSUURA, MORIMOTO, TASHIRO, HIGASHINAKAGAWA, and MURAMATSU, 629
HIKIDA, ROBERT S. See Letters to the Editor, 713

HINKLEY, ROBERT E., and TELSER, ALVIN G. The effects of halothane on cultured mouse neuroblastoma cells. I. Inhibition of morphological differentiation, 531
HUMBERT, FABIENNE. See PRICAM, HUMBERT, PERRELET, and ORCI, 349

I

ITO, S., and SCHOFIELD, G. C. Studies on the depletion and accumulation of microvilli and changes in the tubulovesicular compartment of mouse parietal cells in relation to gastric acid secretion, 364

J

JAFFE, LIONEL F., and NUCCITELLI, RICHARD. An ultrasensitive vibrating probe for measuring steady extracellular currents, 614
JAHROMI, S. S., and ATWOOD, H. L. Three-dimensional ultrastructure of the crayfish neuromuscular apparatus, 599
JAMIESON, J. D. See AMSTERDAM and JAMIESON, 1037, 1057
JOHNSEN, SVEN, STOKKE, TORBJØRN, and PRYDZ, HANS. HeLa cell plasma membranes. I. 5′-Nucleotidase and ouabain-sensitive ATPase as markers for plasma membranes, 357
JONES, K. See CONKIE, AFFARA, HARRISON, PAUL, and JONES, 414
JORGENSEN, GEORGE. See KIT, LEUNG, JORGENSEN, TRKULA, and DUBBS, 505

K

KALIMO, HANNU. See PENTTILA, KALIMO, and TRUMP, 197
KASAMATSU, HARUMI. See MATSUMOTO, KASAMATSU, PIKÓ, and VINOGRAD, 146
KATSUTA, KIMIO. See TAMAI, ARAKI, KATSUTA, and SATAKE, 749
KAYE, GORDON I. See PERLMAN, BAUM, and KAYE, 306
KEDINGER, CLAUDE, and SIMARD, RENÉ. The action of α-amanitin on RNA synthesis in Chinese hamster ovary cells. Ultrastructural and biochemical studies, 831
KIERSZENBAUM, A. L., and TRES, LAURA L. Transcription sites in spread meiotic prophase chromosomes from mouse spermatocytes, 923
KINNE, ROLF. See BODE, POCKRANDT-HEMSTEDT, BAUMANN, and KINNE, 998
KISHI, KIYOSHI. Electron microscope studies on puromycin-induced changes in nerve cells of the medulla oblongata, 1091
KIT, SAUL, LEUNG, WAI-CHOI, JORGENSEN, GEORGE, TRKULA, DAVID, and DUBBS, DEL ROSE. Acquisition of chick cytosol thymidine kinase activity by thymidine kinase-deficient mouse fibroblast cells after fusion with chick erythrocytes, 505
KOSHER, ROBERT A. See DANIEL, KOSHER, HAMOS, and LASH, 843
KUROIWA, TSUNEYOSHI. Studies on mitochondrial structure and function in *Physarum polycephalum*. III. Electron microscopy of a large amount of DNA released from a central body in mitochondria by trypsin digestion, 299

L

LAMPORT, DEREK T. A. See MILLER, MELLMAN, LAMPORT, and MILLER, 420
LANKS, KARL W., DORWIN, JAN M., and PAPIRMEISTER, BRUNO. Increased rate of acetylcholinesterase synthesis in differentiating neuroblastoma cells, 824
LASH, JAMES W. See DANIEL, KOSHER, HAMOS, and LASH, 843
LASTER, YEHUDITH. See PERETZ, TOISTER, LASTER, and LOYTER, 1
LEUNG, WAI-CHOI. See KIT, LEUNG, JORGENSEN, TRKULA, and DUBBS, 505
LEVINE, R. P. See BECK and LEVINE, 759
LOYTER, ABRAHAM. See PERETZ, TOISTER, LASTER, and LOYTER, 1

M

MAGEE, WAYNE E., GOFF, CHARLES W., SCHOKNECHT, JEAN, SMITH, M. DIANE, and CHERIAN, K. The interaction of cationic liposomes containing entrapped horseradish peroxidase with cells in culture, 492
MAREŠ, V., SCHULTZE, B., and MAURER, W. Stability of DNA in Purkinje cell nuclei of the mouse. An autoradiographic study, 665
MARTIN, JAMES H. See DAVIS, GOODMAN, SCHUSTER, RASMUSSEN, and MARTIN, 986
MATOLTSY, A. GEDEON. See SKERROW and MATOLTSY, 515, 524
MATSUMOTO, LLOYD, KASAMATSU, HARUMI, PIKÓ, LAJOS, and VINOGRAD, JEROME. Mitochondrial DNA replication in sea urchin oocytes, 146
MATSUURA, S., MORIMOTO, T., TASHIRO, Y., HIGASHINAKAGAWA, T., and MURAMATSU, M. Ultrastructural and biochemical studies on the precursor ribosomal particles isolated from rat liver nucleoli, 629
MAURER, W. See MAREŠ, SCHULTZE, and MAURER, 665
MCKANNA, JAMES A. Permeability modulating membrane coats. I. Fine structure of fluid segregation organelles of peritrich contractile vacuoles, 317
MCLAUGHLIN, BARBARA J. See WOOD, MCLAUGHLIN, and BARBER, 541
MELLMAN, IRA SETH. See MILLER, MELLMAN, LAMPORT, and MILLER, 420
MILLER, DAVID H., MELLMAN, IRA SETH, LAMPORT, DEREK T. A., and MILLER, MAUREEN. The chemical composition of the cell wall of *Chlamydomonas gymnogama* and the concept of a plant cell wall protein, 420
MILLER, HARUKO. See WHITLOCK, MILLER, and GELBOIN, 136
MILLER, MAUREEN. See MILLER, MELLMAN, LAMPORT, and MILLER, 420
MILLER, RICHARD A., and RUDDLE, FRANK H. Enucleated neuroblastoma cells form neurites when treated with dibutyryl cyclic AMP, 295

MORIMOTO, T. See MATSUURA, MORIMOTO, TASHIRO, HIGASHINAKAGAWA, and MURAMATSU, 629
MOUDRIANAKIS, EVANGELOS N. See OLESZKO and MOUDRIANAKIS, 936
MURAMATSU, M. See MATSUURA, MORIMOTO, TASHIRO, HIGASHINAKAGAWA, and MURAMATSU, 629

N

NAROTZKY, ROBERT, and BONDAREFF, WILLIAM. Biogenic amines in cultured neuroblastoma and astrocytoma cells, 64

INDEX TO SUBJECTS

A

Acetylcholinesterase synthesis, differentiating neuroblastoma cells, biochemical and cytological study, 824

Acid, gastric, effect on microvilli and tubulovesicular membranes, mouse parietal cells, cytological and freeze-fracture EM study, 364

Acrosomal disruption, rat and guinea pig sperm membranes, freeze-fracture EM study, 466

Actinomycin D, Chinese hamster cells sensitive and resistant to, biochemical study, 773

Adenosine monophosphate, cyclic, role in agglutination of mouse fibroblasts by concanavalin A, cytological study, 288

— monophosphate, dibutyryl cyclic, effect on neural differentiation, neuroblastoma glioma somatic cell hybrids, phase-contrast and EM study, 691

— monophosphate, dibutyryl cyclic, and neurite formation, enucleated neuroblastoma cells, cytological study, 295

— triphosphate, and bivalent cations, role in fusion of human erythrocytes and erythrocyte ghosts, biochemical and light and EM study, 1

— triphosphate removal and rigor wave formation, sea urchin sperm flagella, physical and light microscope study, 970

Adhesion, intercellular, protrusions of rat leukemia cells, biochemical and light and cytochemical EM study, 109

—, normal and virus-transformed mouse fibroblasts, effect of substrate-attached glycoproteins, biochemical and cytological study, 71

Agglutination of mouse fibroblasts by concanavalin A, role of cyclic AMP, cytological study, 288

Alga *Chlamydomonas gymnogama*, chemical composition of cell wall, hydroxyproline-rich glycoprotein, biochemical and phase-contrast and EM study, 420

— *Chlamydomonas reinhardtii*, basal bodies and mitotic apparatus, high voltage EM study, 325

— *Chlamydomonas reinhardtii*, chloroplast ribosome biogenesis, characterization of mutants, biochemical and genetic and EM study, 160

— *Chlamydomonas reinhardtii*, chloroplasts, synthesis of membrane polypeptides during synchronous growth, biochemical study, 759

— *Chlamydomonas reinhardtii*, mutants, conversion of protoporphyrin-IX to magnesium protoporphyrin, genetic control of chlorophyll synthesis, biochemical and cytological and EM study, 806

—, green *Oedogonium cardiacum*, vegetative filaments, effect of isopropyl-*N*-phenyl carbamate on mitotic apparatus and phycoplast, Nomarski and EM and high voltage EM study, 84

— *Nitella translucens*, endoplasmic filaments, rotational streaming, physical and Nomarski and cinematographic study, 270

— *Pelvetia*, embryo, measurement of steady extracellular currents by ultrasensitive vibrating probe, electrophysiological study, 614

α-Amanitin, effect on RNA synthesis, Chinese hamster ovary cells, autoradiographic and biochemical and EM study, 831

Amines, biogenic, presence in cultured astrocytoma and neuroblastoma cells, biochemical and fluorescence histochemical study, 64

Amino acid incorporation, dispersed guinea pig pancreatic exocrine cells, biochemical and autoradiographic EM study, 1057

— acid and potassium transport, human leukocytes, effect of phagocytosis, biochemical study, 215

Anesthesia, halothane, inhibition of nerve cell differentiation, mouse neuroblastoma cells, Nomarski and EM study, 531

Azurophil and specific granules, human neutrophilic polymorphonuclear leukocytes, biochemical and EM study, 251

B

Basal bodies and mitotic apparatus, *Chlamydomonas reinhardtii*, high voltage EM study, 325

Biology, use of high voltage electron microscope, review article, 717

Bladder, urinary, toad, effects of cytochalasin B on response to vasopressin, physiological and EM study, 986

Blood, erythrocyte ghosts, human, intramembrane particle aggregation, effects of protein removal, biochemical and freeze-fracture EM study, 1018

— leukocytes, human, ultrastructure of hematopoietic colonies, cytological and EM study, 855

Brain, monkey, neuronal perikarya with dispersed ribosomes in visual cortex, light and EM study, 1074

—, mouse, stability of DNA in Purkinje cell nuclei, autoradiographic study, 665

—, rat, isolation of postsynaptic densities, biochemical and EM study, 441

—, rat, molecular composition of submicrosomal membrane lipid, biochemical and EM study, 749

—, rat, proteins of postsynaptic density, biochemical study, 456

Buffer storage, effect on fine structure and catalase cytochemistry, rat liver peroxisomes, EM study, 675

C

Calcium-containing fixative, effects on ray cholinergic synaptic vesicles, EM study, 780
Cardiac tissue, opossum, bat, hummingbird, and zebra finch, lamellar junctional sarcoplasmic reticulum, EM study, 337
Cartilage matrix components, chick embryo chondrocytes, effect of external potassium, biochemical study, 843
Catalase cytochemistry and fine structure, rat liver peroxisomes, effect of buffer storage, EM study, 675
Cathepsin B_1 and protein degradation, rat fibroblasts, inhibition by chloroquine, biochemical and light and EM study, 430
Cations, divalent, and ATP, role in fusion of human erythrocytes and erythrocyte ghosts, biochemical and light and EM study, 1
Cell cycle, role in cell contact dependence of surface galactosyltransferase, Balb/c 3T3 and 3T12 cells, autoradiographic and biochemical study, 796
— cycle, role in hormone-dependent differentiation, mouse mammary gland, biochemical study, 707
— wall, *Chlamydomonas gymnogama*, chemical composition of, hydroxyproline-rich glycoprotein, biochemical and phase-contrast and EM study, 420
Cells, astrocytoma C6 and neuroblastoma C-1300, biogenic amines, biochemical and fluorescence histochemical study, 64
—, Balb/c 3T3 and 3T12, cell contact dependence of surface galactosyltransferase, role of cell cycle, autoradiographic and biochemical study, 796
—, chick embryo chondrocytes, effect of external potassium on cartilage matrix components, biochemical study, 843
—, chick embryo retina, effect of cortisol washout on γ-glutamyl transferase activity, biochemical study, 312
—, Chinese hamster ovary, effect of α-amanitin on RNA synthesis, autoradiographic and biochemical and EM study, 831
—, Chinese hamster sublines, sensitive and resistant to actinomycin D, biochemical study, 773
—, diploid and polytene, bean embryo, RNA synthesis, biochemical and cytological study, 1097
—, Ehrlich ascites tumor, effect of glutaraldehyde and/or osmium tetroxide on cell volume, ion content, mechanical stability, and membrane permeability, cytological and EM study, 197
—, epithelial fibroblasts and kidney, human, cellular interactions in morphogenesis of epithelial mesenchymal systems, cytological and cinemicrophotographic study, 343
—, erythrocytes, lymphocytes, and L-929 strain, visualization of concanavalin A-binding sites, scanning EM study, 699
—, exocrine, guinea pig pancreas, dispersion technique, biochemical and light and EM study, 1037
—, exocrine, guinea pig pancreas, functional characteristics of dispersed cells, biochemical and autoradiographic EM study, 1057
—, granulosa, rabbit ovarian follicle, ontogeny of gap junctions, freeze-fracture EM study, 234
—, HeLa, absorption of cationic liposomes containing entrapped horseradish peroxidase, biochemical and cytochemical and scanning EM study, 492
—, HeLa S3, plasma membranes, 5′-nucleotidase and ouabain-sensitive ATPase as marker enzymes, biochemical and EM study, 357
—, L, 3T3 and SV40 transformed 3T3, calf embryo fibroblasts, in vitro pinocytosis, quantitative assay, biochemical and cytochemical study, 949
—, LM(TK$^-$) mouse fibroblasts, fusion with chick erythrocytes, activation of chick cytosol thymidine kinase, autoradiographic and biochemical study, 505
—, mesangial and lacis, rat kidney, gap junctions, freeze-etch EM study, 349
—, mouse C1300 neuroblastoma, enucleated, dibutyryl cyclic AMP and neurite formation, cytological study, 295
—, mouse fetal liver, *in situ* localization of globin messenger RNA formation, autoradiographic and biochemical and immunological study, 402
—, mouse fibroblasts, normal and virus-transformed, substrate-attached glycoproteins and adhesion, biochemical and cytological study, 71
—, mouse fibroblasts 3T3, 3T3cAMP^{tes}, and L929, agglutination by concanavalin A, role of cyclic AMP, cytological study, 288
—, mouse Friend (clone 707), lymphoma L51787, and LS, *in situ* localization of globin messenger RNA formation, effect of dimethyl sulfoxide, autoradiographic and biochemical and immunological study, 414
—, mouse neuroblastoma, effects of halothane on nerve cell differentiation, Nomarski and EM study, 531
—, mouse neuroblastoma N18 rat glioma C6 hybrid, neuronal differentiation, effect of cyclic AMP, phase-contrast and EM study, 691
—, myogenic, tadpole skeletal muscle, microtubular organization, light and EM study, 550
—, nerve, effect of puromycin, rat and mouse medulla oblongata, light and EM study, 1091
—, neuroblastoma N18, differentiating, acetylcholinesterase synthesis, biochemical and cytological study, 824
—, parietal, hamster stomach, osmium deposition, EM study, 99
—, parietal, mouse stomach, effect of gastric acid secretion on microvilli and tubulovesicular membranes, cytological and freeze-fracture EM study, 364
—, rat embryo fibroblasts, analytical fractionation of subcellular components, distribution of enzymes, cholesterol, and RNA, biochemical study, 383
—, rat fibroblasts, chloroquine inhibition of cellular protein degradation and cathepsin B_1, biochemical and light and EM study, 430
—, rat leukemia IRC-741, surface heterogeneity of main cell body and protrusions, biochemical and light and cytochemical EM study, 109

Cells, rat spinal cord and olfactory bulb explants, developing plasma membrane of nerve growth cones and young fibers, light and freeze-fracture EM study, 180
—, Reuber (H35) hepatoma, induction of aryl hydrocarbon (benzo[a]pyrene) hydroxylase and tyrosine aminotransferase, biochemical study, 136
—, stellate, rat liver, vitamin A-rich lipid droplets in multivesicular bodies, fluorescence and EM study, 683
Central body, mitochondria of *Physarum polycephalum*, DNA release, light and EM study, 299
Cerebellum, rat, concanavalin A-binding sites in Purkinje cell somata and dendrites, cytochemical light and EM study, 541
Chick erythrocytes, fusion with mouse fibroblasts, activation of chick cytosol thymidine kinase, autoradiographic and biochemical study, 505
Chlorophyll synthesis, genetic control, *Chlamydomonas* mutants, conversion of protoporphyrin-IX to magnesium protoporphyrin, biochemical and cytological and EM study, 806
—, *Chlamydomonas reinhardtii*, ribosome biogenesis, characterization of mutants, biochemical and genetic and EM study, 160
Chloroplasts, *Chlamydomonas reinhardtii*, synthesis of membrane polypeptides during synchronous growth, biochemical study, 759
—, spinach, thylakoid coupling factor particles, freeze-etch and negative-staining EM study, 24
—, spinach, visualization of photosynthetic coupling factor, biochemical and EM study, 936
Chloroquine inhibition of cellular protein degradation and cathepsin B_1, rat fibroblasts, biochemical and light and EM study, 430
Cholesterol, RNA, and enzyme distribution, subcellular components of rat embryo fibroblasts, biochemical study, 383
Chromatin, image analysis, preimplantation mouse embryo, cytological study, 227
Chromosomes, spread meiotic prophase, transcription sites, mouse spermatocytes, autoradiographic and EM study, 923
Cilia, mussel gill, radial spoke positional changes and microtubule sliding, light and EM study, 35
—, *Tetrahymena pyriformis*, resorption and regeneration, biochemical and cytological and scanning EM study, 1009
Cobalt chloride backfilling, crustacean motor neuron connections, light and EM study, 329
Collagen synthesis and fine structure, rabbit corneal endothelium, correlation in monolayer cultures, autoradiographic and biochemical and EM study, 306
Concanavalin A agglutination of mouse fibroblasts, role of cyclic AMP, cytological study, 288
— A-binding sites, Purkinje cell somata and dendrites, rat cerebellum, cytochemical light and EM study, 541
— A-binding sites, visualization in erythrocytes, lymphocytes, and L-929 cells, scanning EM study, 699
Cornea, rabbit, monolayer culture of endothelium, correlation of fine structure and collagen synthesis, autoradiographic and biochemical and EM study, 306
Cortex, rat kidney, isolation of pinocytic vesicles, biochemical and EM study, 998
—, visual, neuronal perikarya with dispersed ribosomes, monkey brain, light and EM study, 1074
Cortisol, effect of washout on γ-glutamyl transferase activity, chick embryo retina cells, biochemical study, 312
Coupling factor particles, spinach chloroplast thylakoids, freeze-etch and negative-staining EM study, 24
— factor, photosynthetic, visualization of in spinach chloroplasts, biochemical and EM study, 936
Cow, nose, epidermis, characterization of desmosomes, biochemical study, 524
—, nose, epidermis, isolation of desmosomes, biochemical and EM study, 515
—, retina, accessibility of rhodopsin in photoreceptor membranes to proteases, biochemical and EM study, 480
Crayfish *Procambarus blandingii*, neuromuscular apparatus, three-dimensional ultrastructure, EM study, 599
— *Procambarus clarki*, motor neuron connections traced by backfilling, light and EM study, 329
Currents, steady extracellular, measurement of by ultrasensitive vibrating probe, fucoid embryo, electrophysiological study, 614
Cycloheximide, effect on acetylcholinesterase synthesis, differentiating neuroblastoma cells, biochemical and cytological study, 824
—, effect on cilia regeneration, *Tetrahymena pyriformis*, biochemical and cytological and scanning EM study, 1009
Cytochalasin B, effects on response of toad urinary bladder to vasopressin, physiological and EM study, 986
Cytosol, chick, thymidine kinase activation, fusion of chick erythrocytes and mouse fibroblast cells, autoradiographic and biochemical study, 505

D

Dendrites and soma, Purkinje cell, rat cerebellum, concanavalin A-binding sites, cytochemical light and EM study, 541
Density, postsynaptic, isolation of, rat brain, biochemical and EM study, 441
—, postsynaptic, proteins, rat brain, biochemical study, 456
Deoxyribonucleic acid, mitochondrial replication, sea urchin oocytes, biochemical and EM study, 146
— acid, release from mitochondrial central body, *Physarum polycephalum*, light and EM study, 299
— acid, stability of in Purkinje cell nuclei, mouse brain, autoradiographic study, 665
Desmosomes, cow nose epidermis, characterization of, biochemical study, 524
—, cow nose epidermis, isolation of, biochemical and EM study, 515
Dexamethasone, effect on aryl hydrocarbon hydroxylase and tyrosine aminotransferase, hepatoma cells, biochemical study, 136

Dextrans, graded, permeability of rat kidney glomerular capillaries to, identification of basement membrane as primary filtration barrier, light and EM study, 883
Dimethyl sulfoxide, effect on *in situ* localization of globin messenger RNA formation, Friend virus-transformed mouse cells, autoradiographic and biochemical and immunological study, 414

E

Electric organ, ray *Narcine brasiliensis*, effects of calcium on cholinergic synaptic vesicles, EM study, 780
Electrical steady currents, measurement of with ultrasensitive vibrating probe, fucoid embryo, electrophysiological study, 614
Electron microscopy, crustacean motor neuron connections traced by backfilling, light and EM study, 329
— microscopy, effect of calcium-containing fixative on ray cholinergic synaptic vesicles, EM study, 780
— microscopy, high voltage, use in biology, review article, 717
— microscopy, ultrastructure of hematopoietic colonies derived from human peripheral blood, cytological and EM study, 855
Embryo, bean *Phaseolus coccineus*, RNA synthesis in diploid and polytene cells, biochemical and cytological study, 1097
—, mouse, preimplantation cells, image analysis of chromatin, cytological study, 227
—, *Pelvetia*, measurement of steady extracellular currents by ultrasensitive vibrating probe, electrophysiological study, 614
Endoplasm *Nitella translucens*, filaments, rotational streaming, physical and Nomarski and cinematographic study, 270
Endothelium, rabbit cornea, correlation of fine structure and collagen synthesis in monolayer cultures, autoradiographic and biochemical and EM study, 306
Enzyme digestion, guinea pig pancreas, dispersion of exocrine cells, biochemical and light and EM study, 1037
— distribution, anaerobic mitochondria, *Ascaris lumbricoides*, comparison with mammalian systems, biochemical and EM study, 125
—, γ-glutamyl transferase, chick embryo retina cells, effect of washout of inducing steroid, biochemical study, 312
—, horseradish peroxidase, entrapped in cationic liposomes, interaction with HeLa cells, biochemical and cytochemical and scanning EM study, 492
—, horseradish peroxidase, marker for pinocytosis, mouse fibroblasts, quantitative in vitro assay, biochemical and cytochemical study, 949
—, thymidine kinase, chick cytosol, activation by mouse fibroblast cells after fusion with chick erythrocytes, autoradiographic and biochemical study, 505
Enzymes, aryl hydrocarbon (benzo[a]pyrene) hydroxylase and tyrosine aminotransferase, induction in hepatoma cells, biochemical study, 136
Enzymes, cholesterol, and RNA distribution, subcellular components of rat embryo fibroblasts, biochemical study, 383
—, 5′-nucleotidase and ouabain-sensitive ATPase as markers for HeLa plasma membranes, biochemical and EM study, 357
—, proteases, accessibility of rhodopsin to, bovine retina photoreceptor membranes, biochemical and EM study, 480
Epidermis, cow nose, characterization of desmosomes, biochemical study, 524
—, cow nose, isolation of desmosomes, biochemical and EM study, 515
Epithelial mesenchymal systems, cellular interactions in morphogenesis of, human epithelial, fibroblasts, and kidney cells, cytological and cinemicrophotographic study, 343
Erythrocytes, chick, fusion with mouse fibroblast cells, activation of chick cytosol thymidine kinase, autoradiographic and biochemical study, 505
—, and erythrocyte ghosts, human, virus-induced fusion, role of ATP and bivalent cations, biochemical and light and EM study, 1
Eye, frog, ultrastructure of lipid-depleted rod photoreceptor membranes, biochemical and EM study, 587

F

Filaments, endoplasmic, *Nitella translucens*, rotational streaming, physical and Nomarski and cinematographic study, 270
—, green alga, effect of isopropyl-*N*-phenyl carbamate on mitotic apparatus and phycoplast, Nomarski and EM and high voltage EM study, 84
Filtration barrier, basement membrane, permeability of glomerular capillaries to graded dextrans, rat kidney, light and EM study, 883
Fish, ray *Narcine brasiliensis*, electric organ, effects of calcium on cholinergic synaptic vesicles, EM study, 780
Fixation, effect of glutaraldehyde and/or osmium tetroxide on cell volume, ion content, mechanical stability, membrane permeability, Ehrlich ascites tumor cells, cytological and EM study, 197
—, thick sections, use of high voltage electron microscope in biology, review article, 717
Flagella, sea urchin, sperm, removal of adenosine triphosphate, formation of rigor waves, physical and light microscope study, 970
Flight muscle sarcosomes, *Drosophila melanogaster* αGpdh-1 null mutations, α-glycerophosphate cycle, biochemical and EM study, 864
Fluid segregation organelles, peritrich protozoan contractile vacuoles, EM study, 317
Follicle, ovarian, in vitro acrosomal disruption, rat and guinea pig sperm membranes, freeze-fracture EM study, 466
—, rabbit ovary, ontogeny of gap junctions of granulosa cells, freeze-fracture EM study, 234
Food vacuole membrane growth and transport, *Paramecium*, role of microtubules, freeze-fracture EM study, 904
Frog *Rana pipiens*, eye, ultrastructure of lipid-de-

pleted rod photoreceptor membranes, biochemical and EM study, 587
— *Rana pipiens*, skeletal muscle, microtubular organization in elongating myogenic cells, light and EM study, 550

G

Galactosyltransferase, surface, cell contact dependence, role of cell cycle, Balb/c 3T3 and 3T12 cells, autoradiographic and biochemical study, 796
Ganglia, sensory, rat, damage and repair of peripheral myelin sheath and node of Ranvier, role of trypsin, light and EM study, 1097
Genetic control of chlorophyll synthesis, *Chlamydomonas* mutants, conversion of protoporphyrin-IX to magnesium protoporphyrin, biochemical and cytological and EM study, 806
— null mutations, *Drosophila melanogaster* αGpdh-1, ultrastructure and metabolism, α-glycerophosphate cycle, biochemical and EM study, 864
Ghosts, erythrocyte, and erythrocytes, human, virus-induced fusion, role of ATP and bivalent cations, biochemical and light and EM study, 1
—, erythrocyte, human, intramembrane particle aggregation, effects of protein removal, biochemical and freeze-fracture EM study, 1018
Globin messenger RNA formation, *in situ* localization, fetal mouse liver, autoradiographic and biochemical and immunological study, 402
— messenger RNA formation, *in situ* localization, Friend virus-transformed mouse cells, effect of dimethyl sulfoxide, autoradiographic and biochemical and immunological study, 414
Glomerulus, rat kidney, permeability to graded dextrans, identification of basement membrane as primary filtration barrier, light and EM study, 883
Glutaraldehyde and/or osmium tetroxide, effect on cell volume, ion content, mechanical stability, membrane permeability, Ehrlich ascites tumor cells, cytological and EM study, 197
α-Glycerophosphate cycle, *Drosophila melanogaster* αGpdh-1 null mutations, ultrastructure and metabolism, biochemical and EM study, 864
Glycoprotein, hydroxyproline-rich, *Chlamydomonas gymnogama* cell wall, biochemical and phase-contrast and EM study, 420
—, substrate-attached, and adhesion of normal and virus-transformed mouse fibroblasts, biochemical and cytological study, 71
Glycosaminoglycans, chondrocyte cartilage, effect of external potassium, biochemical study, 843
Granules, specific and azurophil, human neutrophilic polymorphonuclear leukocytes, biochemical and EM study, 251
Guinea pig, pancreas, dispersion of exocrine cells, biochemical and light and EM study, 1037
— pig, pancreas, functional characteristics of dispersed exocrine cells, biochemical and autoradiographic study, 1057
— pig, sperm, acrosomal disruption of membranes, freeze-fracture EM study, 466
— pig, sperm, membrane differentiations, cytological and freeze-fracture and scanning EM study, 641

H

Halothane, inhibition of nerve cell differentiation, mouse neuroblastoma cells, Nomarski and EM study, 531
Hamster, stomach, osmium deposition in parietal cells, EM study, 99
Hematopoiesis, ultrastructure of granulocyte colonies derived from human peripheral blood, cytological and EM study, 855
Hemocyanin, visualization of concanavalin A-binding sites, erythrocytes, lymphocytes, and L-929 cells, scanning EM study, 699
Hormone, vasopressin action on toad urinary bladder, effect of cytochalasin B, physiological and EM study, 986
Hormones, hydrocortisones, insulin, and lactogen, differentiation of mouse mammary gland, role of cell cycle, biochemical study, 707
Horseradish peroxidase, entrapped in cationic liposomes, interaction with HeLa cells, biochemical and cytochemical and scanning EM study, 492
— peroxidase, marker for pinocytosis, mouse fibroblasts, quantitative in vitro assay, biochemical and cytochemical study, 949
Human, blood erythrocyte ghosts, intramembrane particle aggregation, effects of protein removal, biochemical and freeze-fracture EM study, 1018
—, blood leukocytes, ultrastructure of hematopoietic colonies, cytological and EM study, 855
—, erythrocytes, and erythrocyte ghosts, virus-induced fusion, role of ATP and bivalent cations, biochemical and light and EM study, 1
—, neutrophilic polymorphonuclear leukocytes, azurophil and specific granules, biochemical and EM study, 251
—, polymorphonuclear leukocytes, effect of phagocytosis on potassium and amino acid transport, biochemical study, 215
Hydration, biological specimens, use of high voltage electron microscope, review article, 717
Hydroxyproline-rich glycoprotein, *Chlamydomonas gymnogama* cell wall, biochemical and phase-contrast and EM study, 420

I

Immunoglobulins, internal, and plasma membrane, rat lymph node cells, use of antibody conjugates or Fab fragments with horseradish peroxidase, cytochemical light and autoradiographic EM study, 12
Insect *Drosophila melanogaster*, αGpdh-1 null mutations, ultrastructure and metabolism, α-glycerophosphate cycle, biochemical and EM study, 864
— *Drosophila melanogaster*, testes, spoke heads in sperm tail, EM study, 334
Insulin, effect on microvilli and tubulovesicular membranes, mouse parietal cells, cytological and freeze-fracture EM study, 364
Ion content, Ehrlich ascites tumor cells, effect of

glutaraldehyde and/or osmium tetroxide, cytological and EM study, 197
Isopropyl-*N*-phenyl carbamate, effect on mitotic apparatus and phycoplast, green alga filaments, Nomarski and EM and high voltage EM study, 84

J

Junction, neuromuscular, and nonjunctional sarcolemma, rat skeletal muscle excitable membranes, thin and freeze-fracture EM study, 567
Junctions, gap, granulosa cells of rabbit ovarian follicle, freeze-fracture EM study, 234
—, gap, mesangial and lacis cells, rat kidney, freeze-etch EM study, 349

K

Kidney, rat, gap junctions in mesangial and lacis cells, freeze-etch EM study, 349
—, rat, isolation of pinocytic vesicles from cortex, biochemical and EM study, 998
—, rat, permeability of glomerular capillaries to graded dextrans, identification of basement membrane as primary filtration barrier, light and EM study, 883
Kinetochores associated with nuclear envelope, mitosis of dinoflagellate, EM study, 322

L

Lamellar junctional sarcoplasmic reticulum, cardiac tissue of opossum, bat, hummingbird, and zebra finch, EM study, 337
Leukocytes, human blood, ultrastructure of hematopoietic colonies, cytological and EM study, 855
—, neutrophilic polymorphonuclear, human, azurophil and specific granules, biochemical and EM study, 251
—, polymorphonuclear, human, effect of phagocytosis on potassium and amino acid transport, biochemical study, 215
Lipid depletion, frog rod photoreceptor membranes, biochemical and EM study, 587
— droplets, vitamin A-rich, multivesicular bodies of rat liver stellate cells, fluorescence and EM study, 683
—, rat brain submicrosomal membrane, molecular composition, biochemical and EM study, 749
Liposomes, cationic, containing entrapped horseradish peroxidase, interaction with HeLa cells, biochemical and cytochemical and scanning EM study, 492
Liver, rat, nucleoli, precursor ribosomal particles, biochemical and EM study, 629
—, rat, peroxisomes, effect of buffer storage on fine structure and catalase cytochemistry, EM study, 675
—, rat, stellate cells, vitamin A-rich lipid droplets in multivesicular bodies, fluorescence and EM study, 683
Lymph node cells, rat, plasma membrane and internalized immunoglobulins, use of antibody conjugates or Fab fragments with horseradish peroxidase, cytochemical light and autoradiographic EM study, 12

M

Macula adherens (desmosomes), cow nose epidermis, isolation of, biochemical and EM study, 515
Magnesium protoporphyrin, conversion of protoporphyrin-IX to, genetic control of chlorophyll synthesis, *Chlamydomonas* mutants, biochemical and cytological and EM study, 806
Mammary gland, mouse, role of cell cycle in hormone-dependent differentiation, biochemical study, 707
Marker enzymes, 5′-nucleotidase and ouabain-sensitive ATPase, HeLa plasma membranes, biochemical and EM study, 357
Matrix components, chondrocyte cartilage, effect of external potassium, biochemical study, 843
Medulla oblongata, rat and mouse, effect of puromycin on nerve cells, light and EM study, 1091
Membrane, basement, identification of as primary filtration barrier, permeability of glomerular capillaries to graded dextrans, rat kidney, light and EM study, 883
— coats, permeability modulating, fluid segregation organelles, peritrich protozoan contractile vacuoles, EM study, 317
— differentiations, rat and guinea pig sperm, cytological and freeze-fracture and scanning EM study, 641
—, growth and transport, *Paramecium* food vacuole, role of microtubules, freeze-fracture EM study, 904
— particle aggregation, human erythrocyte ghosts, effects of protein removal, biochemical and freeze-fracture EM study, 1018
— permeability, Ehrlich ascites tumor cells, effect of glutaraldehyde and/or osmium tetroxide, cytological and EM study, 197
—, photoreceptor, bovine retina, accessibility of rhodopsin to proteases, biochemical and EM study, 480
—, plasma, developing nerve growth cones and young fibers, rat spinal cord and olfactory bulb explants, light and freeze-fracture EM study, 180
—, plasma, HeLa cells, 5′-nucleotidase and ouabain-sensitive ATPase as marker enzymes, biochemical and EM study, 357
—, plasma, and internalized immunoglobulin, rat lymph node cells, use of antibody conjugates or Fab fragments with horseradish peroxidase, cytochemical light and autoradiographic EM study, 12
—, plasma, rat brain, isolation of postsynaptic densities, biochemical and EM study, 441
— polypeptides, *Chlamydomonas reinhardtii*, chloroplasts, synthesis during synchronous growth, biochemical study, 759
—, submicrosomal, rat brain, molecular composition of lipid, biochemical and EM study, 749
Membranes, excitable, rat skeletal muscle, neuromuscular junction and nonjunctional sarcolemma, thin and freeze-fracture EM study, 567

Membranes, photoreceptor, lipid-depleted, frog retina, biochemical and EM study, 587
—, sperm, rat and guinea pig, acrosomal disruption, freeze-fracture EM study, 466
—, tubulovesicular, and microvilli, mouse parietal cells, effect of gastric acid secretion, cytological and freeze-fracture EM study, 364
Mesenchymal epithelial systems, cellular interactions in morphogenesis of, human epithelial, fibroblasts, and kidney cells, cytological and cinemicrophotographic study, 343
Microfilaments, mouse neuroblastoma cells, effect of halothane, Nomarski and EM study, 531
Microsomes, rat brain, molecular composition of membrane lipid, biochemical and EM study, 749
Microtubular organization in elongating myogenic cells, tadpole skeletal muscle, light and EM study, 550
Microtubule, mussel gill, sliding model of ciliary motion, radial spoke positional changes, light and EM study, 35
Microtubules, green alga filaments, effect of isopropyl-*N*-phenyl carbamate, Nomarski and EM and high voltage EM study, 84
—, role in membrane growth and transport, *Paramecium* food vacuole, freeze-fracture EM study, 904
Microvilli and tubulovesicular membranes, mouse parietal cells, effect of gastric acid secretion, cytological and freeze-fracture EM study, 364
Mitochondria, *Ascaris lumbricoides*, anaerobic, enzyme localization, biochemical and EM study, 125
—, *Physarum polycephalum*, DNA release from central body, light and EM study, 299
—, pigeon skeletal muscle, EM study, see Letters to the Editor, 713
—, sea urchin oocytes, DNA replication, biochemical and EM study, 146
Mitosis, dinoflagellate, nuclear envelope-associated kinetochores, in mitosis, EM study, 322
Mitotic apparatus and basal bodies, *Chlamydomonas reinhardtii*, high voltage EM study, 325
— apparatus and phycoplast, green alga filaments, effect of isopropyl-*N*-phenyl carbamate, Nomarski and EM and high voltage EM study, 84
Monkey *Macaca mulatta*, brain, neuronal perikarya with dispersed ribosomes in visual cortex, light and EM study, 1074
Motion, mussel gill cilia, radial spoke positional changes and microtubule sliding, light and EM study, 35
Mouse, brain, stability of DNA in Purkinje cell nuclei, autoradiographic study, 665
—, embryo, preimplantation cells, image analysis of chromatin, cytological study, 227
—, mammary gland, role of cell cycle in hormone-dependent differentiation, biochemical study, 707
—, medulla oblongata, effect of puromycin on nerve cells, light and EM study, 1091
—, spermatocytes, transcription sites in spread meiotic prophase chromosomes, autoradiographic and EM study, 923
—, stomach, parietal cells, effect of gastric acid secretion on microvilli and tubulovesicular membranes, cytological and freeze-fracture EM study, 364
Muscle, opener, crayfish, three-dimensional ultrastructure of neuromuscular apparatus, EM study, 599
—, skeletal, rat, excitable membranes, neuromuscular junction and nonjunctional sarcolemma, thin and freeze-fracture EM study, 567
—, skeletal, tadpole, microtubular organization in elongating myogenic cells, light and EM study, 550
Mussel *Elliptio complanatus*, gill cilia, radial spoke positional changes and microtubule sliding, light and EM study, 35

N

Nematode *Ascaris lumbricoides*, mitochondria, anaerobic, enzyme localization, biochemical and EM study, 125
Nerve cell differentiation, inhibition by halothane, mouse neuroblastoma cells, Nomarski and EM study, 531
— growth cones and young fibers, rat spinal cord and olfactory bulb explants, developing plasma membrane, light and freeze-fracture EM study, 180
Neurite formation and dibutyryl cyclic AMP, enucleated neuroblastoma cells, cytological study, 295
Neuromuscular apparatus, crayfish, three-dimensional ultrastructure, EM study, 599
— junction and nonjunctional sarcolemma, rat skeletal muscle excitable membranes, thin and freeze-fracture EM study, 567
Neuron, fast flexor motor, crustacean, connections traced by backfilling, light and EM study, 329
Neuronal differentiation, neuroblastoma glioma somatic cell hybrids, effect of cyclic AMP, phase-contrast and EM study, 691
Neurons, visual cortex, with dispersed ribosomes, monkey brain, light and EM study, 1074
Nose, cow, epidermis, characterization of desmosomes, biochemical study, 524
—, cow, epidermis, isolation of desmosomes, biochemical and EM study, 515
Nuclear envelope-associated kinetochores, in mitosis of dinoflagellate, EM study, 322
Nucleolus, rat liver, precursor ribosomal particles, biochemical and EM study, 629
Nucleus, Purkinje cell, mouse brain, stability of DNA, autoradiographic study, 665

O

Oocytes, sea urchin, mitochondrial DNA replication, biochemical and EM study, 146
Organelles, fluid segregation, peritrich protozoan contractile vacuoles, EM study, 317
Osmium tetroxide deposition in parietal cells, hamster stomach, EM study, 99
— tetroxide and/or glutaraldehyde, effect on cell

volume, ion content, mechanical stability, membrane permeability, Ehrlich ascites tumor cells, cytological and EM study, 197
Ovary, rabbit, ontogeny of follicle, gap junctions of granulosa cells, freeze-fracture EM study, 234

P

Pancreas, guinea pig, dispersion of exocrine cells, biochemical and light and EM study, 1037
—, guinea pig, functional characteristics of dispersed exocrine cells, biochemical and autoradiographic EM study, 1057
Perikarya, neuronal, with dispersed ribosomes, monkey visual cortex, light and EM study, 1074
Permeability of glomerular capillaries to graded dextrans, identification of basement membrane as primary filtration barrier, rat kidney, light and EM study, 883
Peroxisomes, rat liver, effect of buffer storage on fine structure and catalase cytochemistry, EM study, 675
Phagocytosis, effect on potassium and amino acid transport, human leukocytes, biochemical study, 215
Photoreceptor membranes, lipid-depleted, frog retina, biochemical and EM study, 587
Photosynthesis, visualization of coupling factor, spinach chloroplasts, biochemical and EM study, 936
Phycoplast and mitotic apparatus, green alga filaments, effect of isopropyl-*N*-phenyl carbamate, Nomarski and EM and high voltage EM study, 84
Pinocytosis, mouse fibroblasts, quantitative in vitro assay, biochemical and cytochemical study, 949
—, rat kidney cortex vesicles, biochemical and EM study, 998
Plant, bean *Phaseolus coccineus*, embryo, RNA synthesis in diploid and polytene cells, biochemical and cytological study, 1097
—, spinach, chloroplasts, visualization of photosynthetic coupling factor, biochemical and EM study, 936
—, spinach *Spinacia oleracia*, chloroplast thylakoids, coupling factor particles, freeze-etch and negative-staining EM study, 24
Polypeptides, chloroplast membranes, *Chlamydomonas reinhardtii*, synthesis during synchronous growth, biochemical study, 759
Porphyrin, proto-, magnesium, conversion of protoporphyrin-IX to, genetic control of chlorophyll synthesis, *Chlamydomonas* mutants, biochemical and cytological and EM study, 806
Potassium and amino acid transport, human leukocytes, effect of phagocytosis, biochemical study, 215
—, external, effect on cartilage matrix components, chick embryo chondrocytes, biochemical study, 843
Probe, ultrasensitive vibrating, measurement of steady extracellular currents, fucoid embryo, electrophysiological study, 614
Proteases, accessibility of rhodopsin to, bovine retina photoreceptor membranes, biochemical and EM study, 480
Protein degradation and cathepsin B_1, rat fibroblasts, inhibition by chloroquine, biochemical and light and EM study, 430
—, glyco-, hydroxyproline-rich, *Chlamydomonas gymnogama* cell wall, biochemical and phase-contrast and EM study, 420
—, postsynaptic density, rat brain, biochemical study, 456
— removal, effects on intramembrane particle aggregation, human erythrocyte ghosts, biochemical and freeze-fracture EM study, 1018
— synthesis, *Chlamydomonas reinhardtii* chloroplast ribosomes, characterization of mutants, biochemical and genetic and EM study, 160
— synthesis, and cilia regeneration, *Tetrahymena pyriformis*, biochemical and cytological and scanning EM study, 1009
Protoporphyrin-IX, conversion to magnesium protoporphyrin, genetic control of chlorophyll synthesis, *Chlamydomonas* mutants, biochemical and cytological and EM study, 806
Protozoan, dinoflagellate *Amphidinium*, nuclear envelope-associated kinetochores, in mitosis, EM study, 322
— *Epistylis plicatilis*, contractile vacuoles, fluid segregation organelles, EM study, 317
— *Paramecium caudatum*, food vacuole membrane growth and transport, role of microtubules, freeze-fracture EM study, 904
— *Tetrahymena pyriformis*, cilia resorption and regeneration, biochemical and cytological and scanning EM study, 1009
Protrusions and main cell body, heterogeneity of surface, rat leukemia cells, biochemical and light and cytochemical EM study, 109
Purkinje cell nucleus, mouse brain, stability of DNA, autoradiographic study, 665
— cell somata and dendrites, rat cerebellum, concanavalin A-binding sites, cytochemical light and EM study, 541
Puromycin, effect on nerve cells, rat and mouse medulla oblongata, light and EM study, 1091

R

Rabbit, cornea, monolayer culture of endothelium, correlation of fine structure and collagen synthesis, autoradiographic and biochemical and EM study, 306
—, ovary, ontogeny of follicle, gap junctions of granulosa cells, freeze-fracture EM study, 234
Radial spoke positional changes and microtubule sliding, mussel gill cilia, light and EM study, 35
Radioactive label, [^{14}C]acetate, [^{3}H]acetate, [^{3}H]arginine, and [^{35}S]sulfate, synthesis of chloroplast membrane polypeptides during synchronous growth, *Chlamydomonas reinhardtii*, biochemical study, 759
— label, [^{14}C]adenine, [^{3}H]leucine, [^{3}H]methoxypuromycin, [*methyl*-^{3}H]thymidine, and [^{3}H]uridine, Chinese hamster cells sensitive and resistant to actinomycin D, biochemical study, 773
— label, [^{14}C]cholesterol and [^{125}I]sodium iodide, in-

teraction of cationic liposomes containing entrapped horseradish peroxidase with HeLa cells, biochemical and cytochemical and scanning EM study, 492
— label, [^{14}C]glucosamine, [^{14}C]proline, [^{3}H]glycine, and [^{35}S]sodium sulfate, effect of external potassium on cartilage matrix components, chick embryo chondrocytes, biochemical study, 843
— label, [^{14}C]- or [^{3}H]UDP-galactose, cell contact dependence of surface galactosyltransferase, role of cell cycle, Balb/c 3T3 and 3T12 cells, autoradiographic and biochemical study, 796
— label, [^{14}C]- or [^{3}H]uridine, effect of α-amanitin on RNA synthesis, Chinese hamster ovary cells, autoradiographic and biochemical and EM study, 831
— label, [^{14}C]leucine and [^{3}H]leucine, chloroquine inhibition of cellular protein degradation and cathepsin B_1, rat fibroblasts, biochemical and light and EM study, 430
— label, [^{14}C]leucine or lysine, [^{42}K]potassium chloride or carbonate, effect of phagocytosis on potassium and amino acid transport, human leukocytes, biochemical study, 215
— label, [^{14}C]sodium bicarbonate, chloroplast ribosome biogenesis, *Chlamydomonas reinhardtii*, characterization of mutants, biochemical and genetic and EM study, 160
— label, [^{14}C]SV40 marker DNA and [^{3}H]thymidine, mitochondrial DNA replication in sea urchin oocytes, biochemical and EM study, 146
— label, [^{14}C]tryptophan and [^{14}C]tyrosine, biogenic amines in cultured astrocytoma and neuroblastoma cells, biochemical and fluorescence histochemical study, 64
— label, [^{14}C]UDP-galactose and [*methyl*-^{3}H]thymidine, role of cell cycle in hormone-dependent differentiation, biochemical study, 707
— label, [^{14}C]urea, [^{14}C]thiourea, [^{14}C]inulin, [^{3}H]-H_2O, ^{22}Na and ^{36}Cl, effects of cytochalasin B on response of toad urinary bladder to vasopressin, physiological and EM study, 986
— label, [^{3}H]adenosine, RNA synthesis in diploid and polytene cells, bean embryo, biochemical and cytological study, 1097
— label, [^{3}H]amino acids, cilia resorption and regeneration, *Tetrahymena pyriformis*, biochemical and cytological and scanning EM study, 1009
— label, [^{3}H]cortisol, effect of washout of inducing steroid on γ-glutamyl transferase activity, chick embryo retina cells, biochemical study, 312
— label, [^{3}H]DNA, *in situ* localization of globin messenger RNA formation, fetal mouse liver, autoradiographic and biochemical and immunological study, 402
— label, [^{3}H]DNA, *in situ* localization of globin messenger RNA formation, Friend virus-transformed mouse cells, effect of dimethyl sulfoxide, autoradiographic and biochemical and immunological study, 414
— label, [^{3}H]leucine, functional characteristics of dispersed guinea pig pancreatic exocrine cells, biochemical and autoradiographic EM study, 1057
— label, [^{3}H]leucine and [^{3}H]uridine, induction of aryl hydrocarbon hydroxylase and tyrosine aminotransferase in hepatoma cells, biochemical study, 136
— label, [^{3}H]proline, monolayer culture of rabbit corneal endothelium, correlation of fine structure and collagen synthesis, autoradiographic and biochemical and EM study, 306
— label, [^{3}H]thymidine, activation of chick cytosol thymidine kinase by mouse fibroblast cells, after fusion with chick erythrocytes, autoradiographic and biochemical study, 505
— label, [^{3}H]thymidine, substrate-attached glycoproteins and adhesion of normal and virus-transformed mouse fibroblasts, biochemical and cytological study, 71
— label, [^{3}H]uridine, transcription sites in spread meiotic prophase chromosomes, mouse spermatocytes, autoradiographic and EM study, 923
— label, [^{125}I]Fab-peroxidase, plasma membrane and internal immunoglobulins, rat lymph node cells, use of antibody conjugates or Fab fragments with horseradish peroxidase, cytochemical light and autoradiographic EM study, 12
—label, [^{126}I]sodium iodide, pinocytosis in mouse fibroblasts, quantitative in vitro assay, biochemical and cytochemical study, 949
— label, [*methyl*-^{3}H]thymidine and [^{3}H]thymidine, stability of DNA in Purkinje cell nuclei, mouse brain, autoradiographic study, 665
— label, [^{32}P]Na_2HPO_4, visualization of photosynthetic coupling factor, spinach chloroplasts, biochemical and EM study, 936
Rat, brain, isolation of postsynaptic densities, biochemical and EM study, 441
—, brain, molecular composition of submicrosomal membrane lipid, biochemical and EM study, 749
—, brain, proteins of postsynaptic density, biochemical study, 456
—, cerebellum, concanavalin A-binding sites in Purkinje cell somata and dendrites, cytochemical light and EM study, 541
—, kidney cortex, isolation of pinocytic vesicles, biochemical and EM study, 998
—, kidney, gap junctions in mesangial and lacis cells, freeze-etch EM study, 349
—, kidney, permeability of glomerular capillaries to graded dextrans, identification of basement membrane as primary filtration barrier, light and EM study, 883
—, liver, nucleoli, precursor ribosomal particles, biochemical and EM study, 629
—, liver, peroxisomes, effect of buffer storage on fine structure and catalase cytochemistry, EM study, 675
—, liver, stellate cells, vitamin A-rich lipid droplets in multivesicular bodies, fluorescence and EM study, 683
—, lymph node cells, plasma membrane and internalized immunoglobulins, use of antibody conjugates or Fab fragments with horseradish peroxidase, cytochemical light and autoradiographic EM study, 12

Rat, medulla oblongata, effect of puromycin on nerve cells, light and EM study, 1091
—, skeletal muscle, excitable membranes, neuromuscular junction and nonjunctional sarcolemma, thin and freeze-fracture EM study, 567
—, sperm, acrosomal disruption of membranes, freeze-fracture EM study, 466
—, sperm, membrane differentiations, cytological and freeze-fracture and scanning EM study, 641
Retina, bovine, accessibility of rhodopsin in photoreceptor membranes to proteases, biochemical and EM study, 480
—, photoreceptor membranes, lipid-depleted, frog, biochemical and EM study, 587
Rhodopsin, bovine retina photoreceptor membranes, accessibility to proteases, biochemical and EM study, 480
Ribonucleic acid, cholesterol, and enzyme distribution, subcellular components of rat embryo fibroblasts, biochemical study, 383
— acid, messenger, *in situ* localization of formation, fetal mouse liver globin, autoradiographic and biochemical and immunological study, 402
— acid, messenger, *in situ* localization of formation, Friend virus-transformed mouse cells, effect of dimethyl sulfoxide, autoradiographic and biochemical and immunological study, 414
— acid, precursor ribosomal particles, rat liver nucleoli, biochemical and EM study, 629
— acid synthesis, bean embryo diploid and polytene cells, biochemical and cytological study, 1097
— acid synthesis, Chinese hamster ovary cells, effect of α-amanitin, autoradiographic and biochemical and EM study, 831
— acid synthesis, Chinese hamster subline resistant to actinomycin D, biochemical study, 773
Ribonucleoprotein particles, rat brain nucleoli, biochemical and EM study, 629
Ribosome biogenesis, *Chlamydomonas reinhardtii* chloroplasts, characterization of mutants, biochemical and genetic and EM study, 160
Ribosomes, dispersed, neuronal perikarya, monkey visual cortex, light and EM study, 1074
Rigor wave formation and adenosine triphosphate removal, sea urchin sperm flagella, physical and light microscope study, 970

S

Sarcolemma, nonjunctional, and neuromuscular junction, rat skeletal muscle excitable membranes, thin and freeze-fracture EM study, 567
Sarcoplasmic reticulum, lamellar junctional, cardiac tissue of opossum, bat, hummingbird, and zebra finch, EM study, 337
Sarcosomes, flight muscle, *Drosophila melanogaster* αGpdh-1 null mutations, α-glycerophosphate cycle, biochemical and EM study, 864
Sea urchin *Colobocentrotus atratus*, sperm, flagella, removal of adenosine triphosphate and formation of rigor waves, physical and light microscope study, 970
— urchin *Strongylocentrotus purpuratus* and *Lytechinus pictus*, oocytes, mitochondrial DNA replication, biochemical and EM study, 146
Sectioning, thick and thin, use of high voltage electron microscope in biology, review article, 717
Sliding microtubules and ciliary motion, radial spoke positional changes, mussel gill, light and EM study, 35
Slime mold *Physarum polycephalum*, mitochondria, DNA release from central body, light and EM study, 299
Soma and dendrites, Purkinje cell, rat cerebellum, concanavalin A-binding sites, cytochemical light and EM study, 541
Spectrin removal, effect on intramembrane particle aggregation, human erythrocyte ghosts, biochemical and freeze-fracture EM study, 1018
Sperm, guinea pig and rat, membrane differentiations, cytological and freeze-fracture and scanning EM study, 641
—, rat and guinea pig, acrosomal disruption of membranes, freeze-fracture EM study, 466
—, sea urchin, flagella, removal of adenosine triphosphate, formation of rigor waves, physical and light microscope study, 970
— tail, spoke heads, *Drosophila melanogaster* testes, EM study, 334
Spermatocytes, mouse, transcription sites in spread meiotic prophase chromosomes, autoradiographic and EM study, 923
Spoke heads in sperm tail, *Drosophila melanogaster* testes, EM study, 334
Stability, mechanical and thermal, Ehrlich ascites tumor cells, effect of glutaraldehyde and/or osmium tetroxide, cytological and EM study, 197
Stereo viewing, thick sections, use of high voltage electron microscope in biology, review article, 717
Steroid, inducing, effect of washout on α-glutamyl transferase activity, chick embryo retina cells, biochemical study, 312
Stomach, hamster, osmium deposition in parietal cells, EM study, 99
—, mouse, parietal cells, effect of gastric acid secretion on microvilli and tubulovesicular membranes, cytological and freeze-fracture EM study, 364
Streaming, rotational, *Nitella translucens*, endoplasmic filaments, physical and Nomarski and cinematographic study, 270
Subcellular components, rat embryo fibroblasts, distribution of enzymes, cholesterol, and RNA, biochemical study, 383
Substrate-attached glycoproteins and adhesion of normal and virus-transformed mouse fibroblasts, biochemical and cytological study, 71
Surface galactosyltransferase, cell contact dependence, role of cell cycle, Balb/c 3T3 and 3T12 cells, autoradiographic and biochemical study, 796
— heterogeneity, rat leukemia IRC-741 main cell body and protrusions, biochemical and light and cytochemical EM study, 109
Synapse, dendritic excitatory, rat brain, isolation of postsynaptic densities, biochemical and EM study, 441

T

Testes, *Drosophila melanogaster*, spoke heads in sperm tail, EM study, 334

Thylakoids, spinach chloroplasts, coupling factor particles, freeze-etch and negative-staining EM study, 24
Thymidine kinase, chick cytosol, activation by mouse fibroblast cells after fusion with chick erythrocytes, autoradiographic and biochemical study, 505
Tissue, cardiac, opossum, bat, hummingbird, and zebra finch, lamellar junctional sarcoplasmic reticulum, EM study, 337
— culture, astrocytoma C6 and neuroblastoma C-1300, biogenic amines, biochemical and fluorescence histochemical study, 64
— culture, human blood leukocytes, ultrastructure of hematopoietic colonies, cytological and EM study, 855
— culture, human epithelial, fibroblasts, and kidney cells, interactions in morphogenesis of epithelial mesenchymal systems, cytological and cinemicrophotographic study, 343
— culture, mouse neuroblastoma N18 rat glioma C6 hybrid cells, neuronal differentiation, effect of cyclic AMP, phase-contrast and EM study, 691
— culture, rabbit corneal endothelium, correlation of fine structure and collagen synthesis, autoradiographic and biochemical and EM study, 306
— culture, rat spinal cord and olfactory bulb, developing plasma membrane of nerve growth cones and young fibers, light and freeze-fracture EM study, 180
— culture, Reuber (H35) hepatoma cells, induction of aryl hydrocarbon hydroxylase and tyrosine aminotransferase, biochemical study, 136
Toad *Bufo marinus*, urinary bladder, effects of cytochalasin B on response to vasopressin, physiological and EM study, 986
Transcription sites, spread meiotic prophase chromosomes, mouse spermatocytes, autoradiographic and EM study, 923
Transferase, galactosyl-, surface, cell contact dependence, role of cell cycle, Balb/c 3T3 and 3T12 cells, autoradiographic and biochemical study, 796
Transverse tubules, pigeon skeletal muscle, EM study, see Letters to the Editor, 713
Trypsin digestion, mitochondrial central body, *Physarum polycephalum*, DNA release, light and EM study, 299
Tubulovesicular membranes and microvilli, mouse parietal cells, effect of gastric acid secretion, cytological and freeze-fracture EM study, 364

V

Vacuoles, contractile, peritrich protozoan, fluid segregation organelles, EM study, 317
—, food, *Paramecium*, membrane growth and transport, role of microtubules, freeze-fracture EM study, 904
Vasopressin action on toad urinary bladder, effect of cytochalasin B, physiological and EM study, 986
Vesicles, pinocytic, isolation from rat kidney cortex, biochemical and EM study, 998
—, synaptic, ray electric organ, effects of calcium-containing fixative, EM study, 780
Vinblastine, effect on cilia regeneration, *Tetrahymena pyriformis*, biochemical and cytological and scanning EM study, 1003
Virus, Sendai, induction of fusion of human erythrocytes and erythrocyte ghosts, role of ATP and bivalent cations, biochemical and light and EM study, 1
Vitamin A-rich lipid droplets, multivesicular bodies of rat liver stellate cells, fluorescence and EM study, 683
Volume, Ehrlich ascites tumor cells, effect of glutaraldehyde and/or osmium tetroxide, cytological and EM study, 197

Statement of Ownership, Management, and Circulation required by Act of 12 August 1970; Section 3685, Title 39, United States Code: *The Journal of Cell Biology*. Published monthly at 1230 York Avenue, New York 10021 by The Rockefeller University Press, New York 10021. Editor: Raymond Griffiths, The Rockefeller University, New York 10021. Owned by The Rockefeller University, New York 10021, nonprofit corporation, authorized to mail at special rates. Purpose, function, and nonprofit status of the organization and the exempt status for Federal income tax purposes have not changed during the preceding 12 months. Following statistics represent 12 month average and number nearest to date of filing: copies printed for each issue, 5028; sales through dealers, street vendors, counter sales, 0; mail subscriptions, 4536. Total paid circulation, 4536; free distribution, 51; office use, leftover, unaccounted, spoiled, 441; net press run, 5028. Single issue nearest filing date October 1974. (Signed W. A. Bayless, Director.)
